

Dear participants,

On our [web page](#) where we present the SEAS Accreditation Program and the SEAS courses all over the world, you can read at the bottom:

ISICO in its approach to the conservative treatment of scoliosis is totally consistent with the SOSORT guidelines of Orthopaedic and Rehabilitation treatment of idiopathic scoliosis during growth [2016 SOSORT guidelines: orthopaedic and rehabilitation treatment of idiopathic scoliosis during growth](#) in all passages starting from the clinical assessment and the treatment with orthosis up to the physiotherapeutic treatment with the SEAS exercises.

Consequently, the SEAS principles can be properly applied according to the objectives and purposes for which they were defined and developed, only in a context consistent with these guidelines.

The certificate for the first step of the SEAS Program, "SEAS Accreditation (SA)," will be awarded on the condition that you confirm, by selecting the appropriate option in the Application Form, that...:

You are conscious that the SEAS Accreditations are valid and can be obtained with a final examination only for those who have declared that their approach to scoliosis is in accordance to these guidelines.

You are consistent and in line with these SOSORT guidelines in your daily clinical practice, and therefore you can also publicly declare (e.g. on brochures, website etc.) that you apply the SEAS approach to your patients.

Obtaining SEAS certification does not authorise you to teach the technique to other colleagues; it solely permits you to apply it in patient care.
